Session D2:

Lecture Room 8

Session D2: Studies on Mesozoic and Paleozoic Foraminifera

Convenors: Oliver Friedrich and Holger Forke

09:00 **Sarit Ashckenazi-Polivoda, Sigal Abramovich, Ahuva Almogi-Labin, Aya Schneider-Mor, Simon Feinstein:** Variation in surface water productivity and sea floor oxygenation during the last phase of the southern Tethys Late Cretaceous upwelling system

09:20 **Aurelie Bonin, Annie Arnaud-Vanneau, Thierry Adatte, Emmanuelle Vennin, Emmanuelle Pucéat:** Upper Valanginian benthic foraminifera evolution during a major carbonate crisis episode: study of a Provençal Platform record (Ollioules section-Southern France)

09:40 **Robert J. Campbell:** New record of Upper Jurassic planktonic foraminifera from the Northeastern Gulf of Mexico

10:00 – 10:20 *Coffee break*

10:20 **Cristina Carapito Krausshar:** Toarcian Benthic Foraminiferal Biostratigraphy and Paleoenvironment of the Maria Pares Section (Lusitanian Basin, Portugal).

10:40 **Holger C. Forke, Daniel Bendias, Lisa Walz, Bastian Koehrer, Thomas Aigner, Michael C. Pöppelreiter:** Larger Benthic Foraminiferal biostratigraphy of a Lower Khuff outcrop equivalent: Saiq Formation, Al Jabal al-Akhdar, Oman Mountains

11:00 **Katarína Holcová:** The Early Devonian Morphogroups Of Agglutinated Foraminifers From The Barrandian Area (czech Republic)

11:20 **Geraint Wyn Hughes:** Palaeoenvironments Of Upper Permian Foraminifera Of Saudi Arabia

11:40 **Christophe Kolodka, Emmanuelle Vennin, Daniel Vachard, Vincent Trocme, Mohammed Goodarzi:** Foraminifers As Biological Evidences Of End-Guadalupian Crisis In The Zagros Mountains (kuh-E Gakhum, Iran)

12:00 – 13:20 *Lunch Break.*

13:20 **Tin Tin Latt, Tsutomu Nakazawa, Xiang-dong Wang, Katsumi Ueno:** Late Visean To Early Moscovian Foraminifers From The Paleo-Tethyan Seamount-Type Carbonates Of The Changning-Menglian Belt, West Yunnan, Southwest China

13:40 **Ezzedine Saïdi, Dalila Zaghib-Turki:** Planktonic Foraminiferal Biostratigraphy And Behaviour During The Late Campanian-Early Maastrichtian At The Oued Necham (on) Section (kalaat Senan, Central Tunisia)

14:00 **Eiichi Setoyama, Jarosław Tyszka, Michael A. Kaminski, Claudia G. Cetean:** Faunal affinity of Late Cretaceous deep-water agglutinated foraminifera of the Barents Sea with the Arctic, Atlantic-Tethyan and Siberian faunas - palaeobiogeographic and palaeoceanographic implications

14:20 **Ines Wendler, Brian T. Huber, Kenneth G. MacLeod, Jens E. Wendler:** Turonian pristine benthic foraminifera from the Tanzania Drilling Project - stable isotopes and shell carbonate geochemistry

14:40 **Narges Khoshkhabar, Masoomah Sohabi-Mollayousefi, Ebrahim Ghasemi-Nejad:** Pelagic foraminifera from Gurpi formation at Kharame section, southeast of Shiraz, Iran

Poster Presentations (Session D2)

Posters for this session will be presented from Wednesday, September 8, to Friday, September 10. Numbers refer to poster board numbers.

- 158 Andrew D. Leighton, Malcolm B. Hart, Christopher W. Smart, Richard Twitchett:** Benthic foraminiferal change across the Cretaceous – Palaeogene boundary at Brazos River, Texas
- 159 Lourdes Omaña, Ruben Lopez-Doncel, Ramon Torres, Gloria Alencaster:** Biostratigraphy and Paleoenvironment of the Cenomanian-Turonian Interval based on foraminifera from the West Valles–San Luis Potosí Platform, Mexico
- 160 Samir Hussain Rashid:** Biofacies and palaeoenvironments of the Oxfordian Hanifa Formation, Saudi Arabia
- 161 Elena Yurievna Zakrevskaya:** Late Cretaceous larger foraminifera in Donetsk Basin (South-eastern part of East European Platform, Ukraine, Russia)
- 162 Mirjam C. Koch, Oliver Friedrich:** Benthic foraminiferal assemblages as indicators of Campanian/Maastrichtian deep-water changes
